

SILC BUSINESS SCHOOL, SHANGHAI UNIVERSITY 2023 INTERNATIONAL MASTER'S PROGRAMS (ENGLISH)

Founded in 1994, SILC Business School is a cooperative educational institution owned by Shanghai University (SHU) in China and University of Technology Sydney (UTS) in Australia. SILC is now one of the leading business schools in Shanghai as well as in China. By bringing together the best of SHU and UTS, integrating high-quality educational resources from abroad, and adhering to strict quality assurance measures, SILC is the beacon of the cooperative educational institutions in China.

SILC welcomes more than 390 international students every year, who make up 10% of the total student population. Conversely, SILC sends approximately 290 Chinese students to overseas universities for short-term and long-term study programs. SILC has signed exchange agreements with more than 100 universities, most of which are located in America and Europe. Students not only study business courses at SILC, with instructional language being English, but can also study basic Chinese courses provided by SILC.

In February 2020, SILC received the AACSB accreditation, placing SILC in the top 5% of business schools in the world. In 2021, SILC was honored as one of the three newly ranked global business schools of Eduniversal- Global Business Schools ranking.

FACTS OF POSTGRADUATE STUDY AT SILC

- Students receive a Shanghai University Master's degree when they meet the academic requirements of SHU.
- Almost all full-time students study and live on the campus of Shanghai University, or temporarily have classes online if they cannot enter China due to the pandemic.
- Currently, there are more than 1,178 postgraduate students studying at SILC, among which 350 are full-time students.
- The average employment rate of full-time postgraduates since 2016 is 99%.
- The duration of study of English programs is typically 2 years for full-time postgraduate programs.
- Full English-teaching programs are offered to English-speaking students.
- Two majors are offered to English-speaking students: Finance and Accounting.
- Sufficient scholarship opportunities at school, university, regional and national levels.
- Schemes and financial support are available for academic publishing and attending conferences.
- Postgraduate students are supervised by qualified academic faculty at SILC and senior executives working in industries.

RESEARCH AT SILC

Postgraduate students can enjoy first-class research resources at SILC. There are six research centers at SILC: Research Centre for Organization and Marketing, Research Centre for Sustainable Urban Development, Research Centre for Corporate Finance and Financial Management, Research Centre for Intelligent Information Processing, Research Centre for Operations Management and the Case Study Centre and SILC Think Tank.

For the last academic year, postgraduate students at SILC published many high-quality academic articles, including 16 SSCI/SCI/EI articles, and 2 JCR articles. 10 cases were selected into the four major case databases and 1 case was selected as one of top 100 excellent cases in China. Currently, there are 87 postgraduate supervisors at SILC who guide students with publications and thesis writing. The SILC Postgraduate Office offers research support such as holding academic seminars and competitions to improve students' data and writing skills.

From studying the major of Finance (Corporate Finance direction), students can learn the modern theories of finance and financial management, base on which new practices and development of financial tools will be introduced to students. Upon graduation, students should have the capacity of working in leading financial companies and industries with an international vision to manage financial resources globally.

By studying the major of Finance (Technology and Internet Finance direction), students can develop capability of applying financial theories to achieve positive outcomes in an increasingly complex world. Subjects in the major focus on the adoption of digitalization and artificial intelligence in the field of finance, which train students to scientifically and efficiently use a range of information technology tools and methods for data collection, analysis, and decision-making purposes.

The major of Finance (Cross-border E-commerce direction) focuses on the e-commerce industry. Students can learn the knowledge and skills of providing financial services to e-commerce companies. Relying on the trend of digitalization of the financial industry, subjects in the major help students command a range of Internet-based tools for tasks such as financing and risk-management to serve cross-border e-commerce companies.

The Accounting major (International Accounting Standards and Information Disclosure direction) contains subjects that investigate the logic of accounting standards and the impact of new standards on enterprises from an international perspective. Getting familiar with the practice of information disclosure of listed companies, students learn to analyze and study the strategies adopted by listed companies in information disclosure and the impact on the allocation of capital market resources.

Based on the development of artificial intelligence, big data and blockchain technologies, the Accounting major (Intelligent Accounting and Digital Management direction) investigates the integrated application of corporate accounting and finance with new information technologies. Students learn to digitally manage ideas of financial decision-making, innovative practices of financial management, and decision-making with visual tools.

The Accounting major (Management Control and Innovation Management direction) looks into theories of management accounting. This major introduces a range of accounting tools in management control and innovation management. Students learn to adopt a data-driven paradigm to manage innovation and guide entrepreneurial practices, focusing on the influence of accounting.
